

The Beehaus uses the standard National frame sizes used in the UK and they are therefore completely interchangeable with standard national beehives and equipment such as honey extractors.

Beehaus Brood Frame - Commonly known as a 14x12 or National Deep Brood Frame.

Beehaus Super Frame - Commonly known as a National Super Frame.

Super frames come in two different thickness either Manley or Hoffman.

You can fit 5 Manley frames in 1 Beehaus super. You can fit 6 Hoffman frames in 1 Beehaus super.

It's cheaper to use Manley frames because you need less!
