

Time to get the nations' felines fit

Omlet launch customisable indoor cat tree system

There are an estimated 12.2 million cats in the UK, and numbers have increased significantly after a year of lockdown. The majority of UK cat owners view cats as more than just pets, but as an important and loyal source of happiness, affection and love. With all they do for us, the least we can provide them with is a way to let them be exactly what they are meant to be - cats!

According to the annual PDSA Paw Report, obesity is seen as one of the top 5 welfare concerns for cats by veterinary professionals, and it's estimated that a shocking 39 to 52 percent of cats in the UK are overweight or obese. Most of these are indoor cats who are limited in terms of exercise and movement, which often leads to frustration and behavioural problems, as well as health issues.

As a nation we clearly need to get these tubby tabbies moving, and Omlet has got the perfect solution!

The new and innovative **Freestyle Cat Tree** is a floor to ceiling, completely customisable cat play system available with a wide range of fun accessories that will encourage cats to live out their natural behaviours - jumping, climbing, grooming, stretching and scratching, as well as a fair bit of serious relaxing. By providing an irresistible opportunity to exercise and explore, Omlet hopes that cats will be able to find the joy in playing that they might have lost after years of rickety scratching posts and dull fluffy toys.

Even the laziest of cats won't be able to resist exploring this amazing play system, which in combination with a well balanced diet will make them **lighter and leaner, healthier and happier!**

The Freestyle Cat Tree centers around strong, extendable vertical poles that can be accessorised with platforms, steps and scratching posts, and connected with ramps and bridges. It's got everything cats need, including optional dens or hammocks where cats can

hide away from the world and properly relax. As an added bonus, it will look great in any home, and can be adjusted in numerous ways to allow cat owners to cater to their pets' needs.

Omlet's Head of Design, Simon Nicholls, said: "We wanted to acknowledge that not all cats are the same and create a cat tree that was customisable and extendable over time, and that could provide indoor cats with everything they needed. The versatility of this product is truly unique and we can't wait for cats around the world to explore it!"

Discover the Freestyle Cat Tree system exclusively at omlet.co.uk. Starting poles priced from £39.99.

Editors notes

We would like to invite you to try out and review the Freestyle Cat Tree from Omlet for yourself. If you wish to try out the system, find out more info or require our high resolution press images, please email marketing@omlet.co.uk.

About Omlet

Omlet is the design and retail brand behind some of the most iconic pet products of the last two decades.

Now considered a design classic, the Eglu chicken coop sparked a revolution in back garden chicken keeping when it launched. Omlet has gone on to transform the pet market with its innovative, beautiful and modern designs that now cover all key categories including cat, dog, small animal, bird and most famously chickens.

A fully integrated product design and global retail business, from its inception in 2004, Omlet has sold direct to the consumer and is available in the UK, US, Europe and Australia.
