You will need...

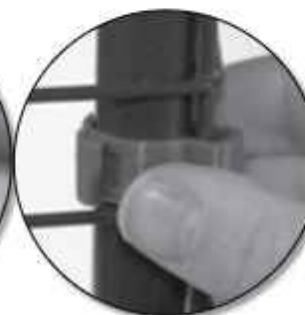

Tip: Warm your clips in warm water to make them easier to use

How to attach Mighty Clips (810.0131, 810.0134)

How to attach Mighty Clips E (810.0185)

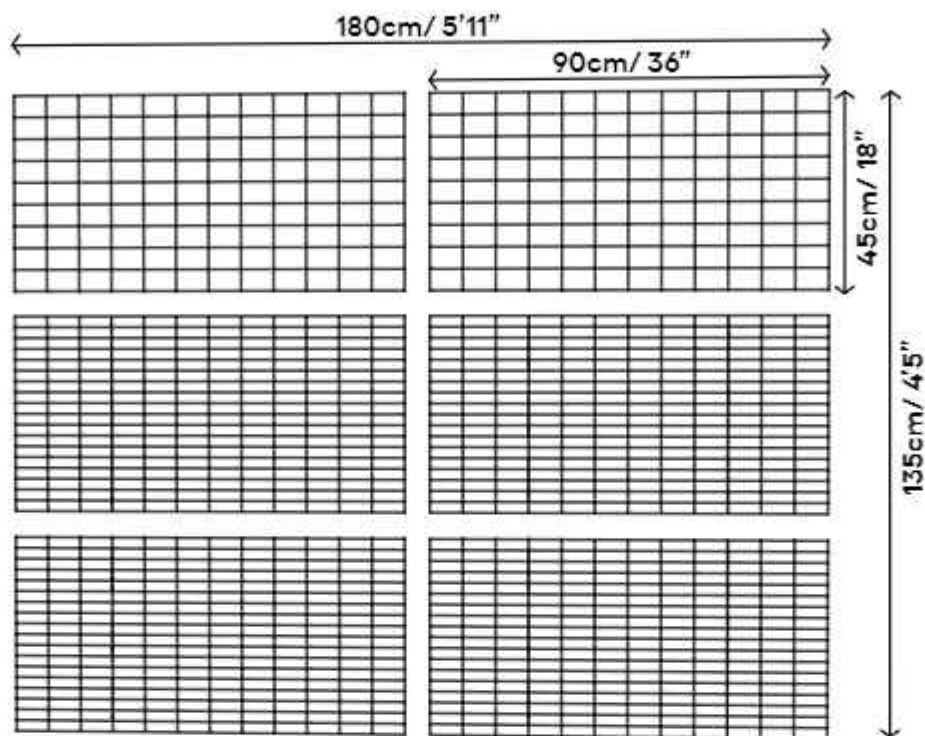

The run is designed to be used outdoors for years to come. However, we recommend that you check your run regularly for signs of corrosion, especially if you live somewhere with extreme weather conditions or close to the sea. Corrosion will occur if the coating has been scratched or scraped, for example. If you do see some, remove any loose rust and touch up with a weather resistant paint.

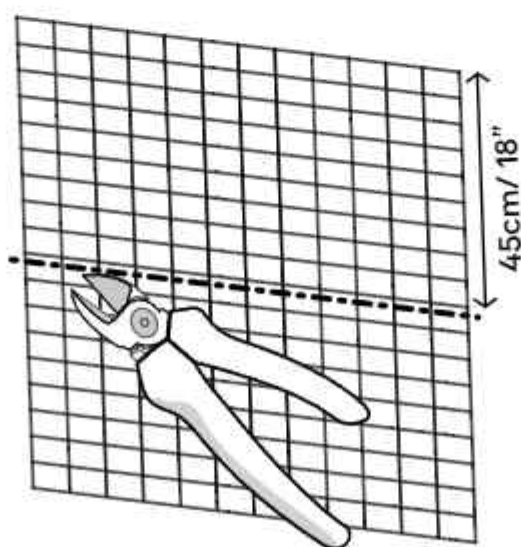

Please separate all your clips into their categories when removed from your Walk In Run and keep them safe for later use!

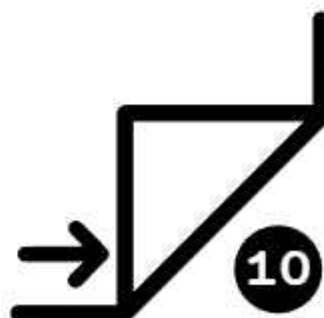

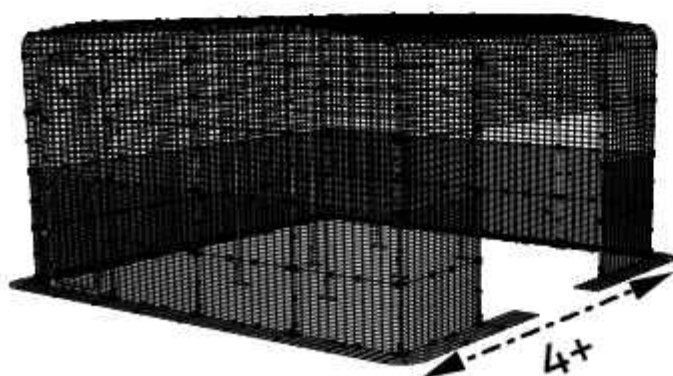

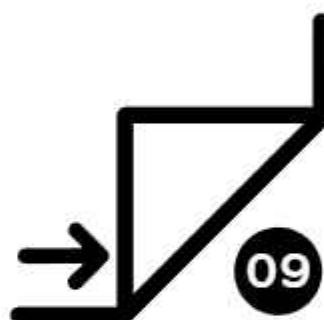

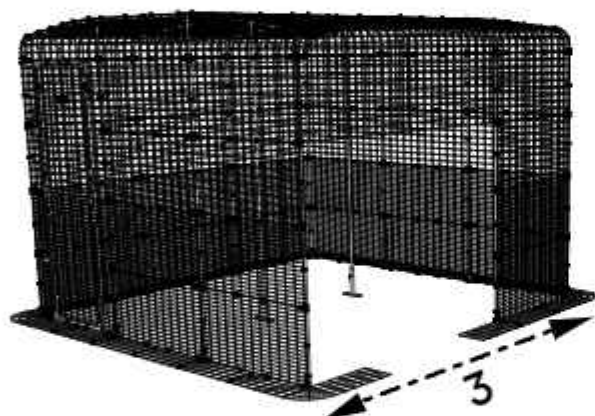

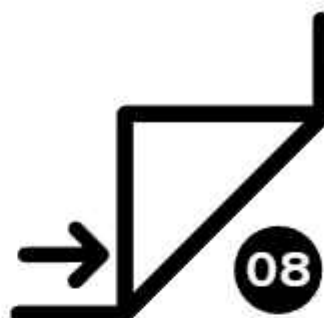

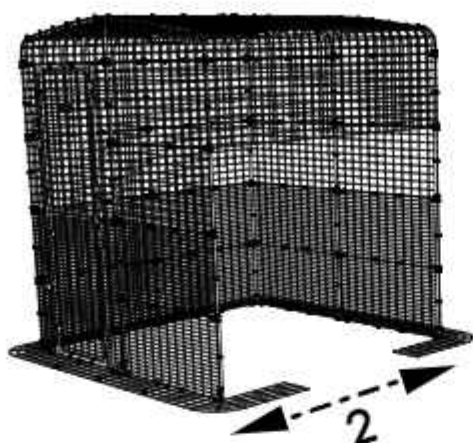

To attach your connection kit you need to remove 6 mesh panels from your Walk in Run.

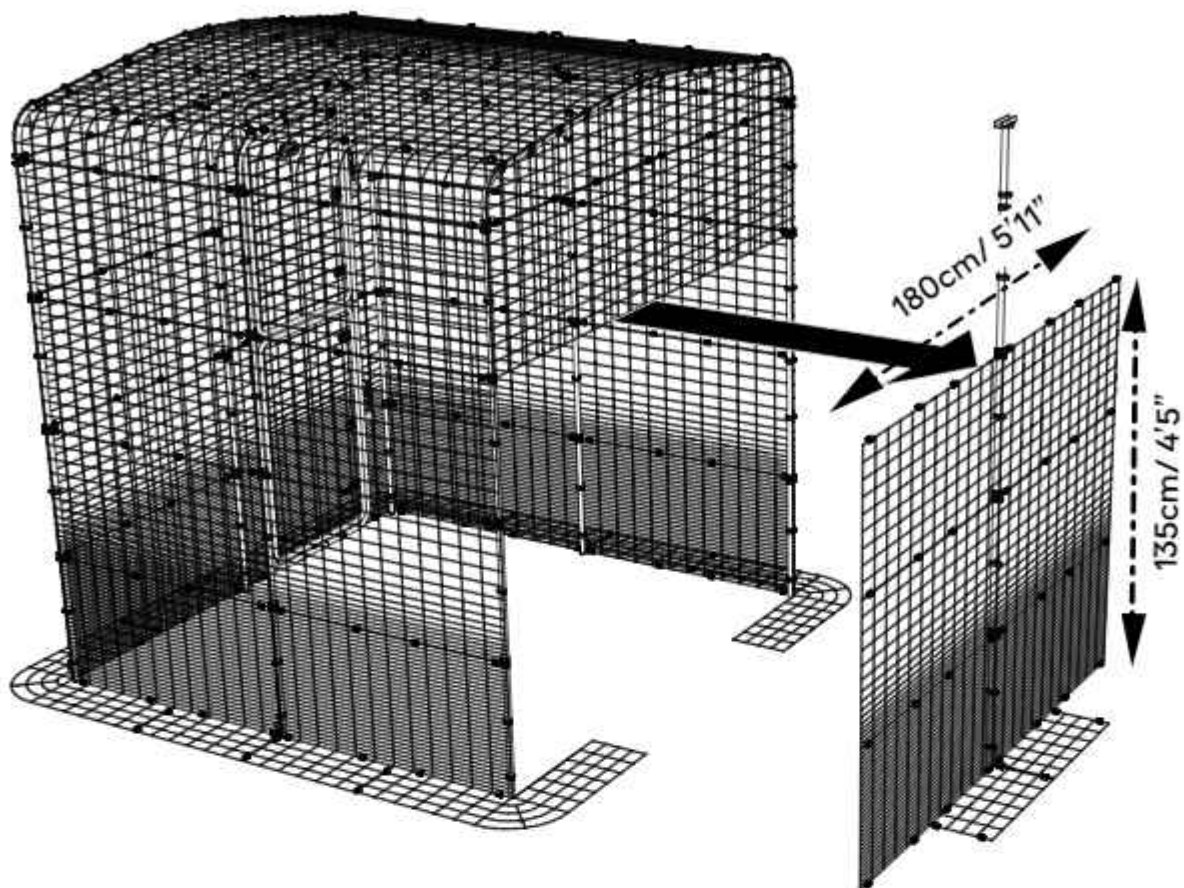

If your Walk In Run has larger side mesh panels, cut the top two panels in half as shown to achieve the required dimensions.
