

EGLU CUBE

House assembly guide

Omlet

IT'S HERE

Your build begins here - are you ready? We recommend popping on a playlist and ordering pizza. And practising your victory dance. Because when you see your finished coop, your chicken keeping joy will be hard to contain.

Watch our step by step video to get it right first go.

www.omlet.us/how_to_build

You will need...

- EN Requires multiple people to build

EN Important Information! Please read before use.

Regular maintenance of the product is recommended. Some components are made from metal and the coating may need maintenance over time. We advise regularly rinsing with potable water, especially if you live in an area that is coastal. If rust spots do develop, repair the area. If unsure how to do this, seek professional advice. Check your clips regularly for damage or fatigue. Compromised clips will affect the integrity of your run. Spare clips are purchasable on our website.

That's it! Congratulations, your new Eglu Cube is now ready for chickens.

Partition: The partition is used to keep your chickens in the roosting area at night.

To unlock the T-handle, push the button and twist the handle at the same time

To lock the T-Handle, turn it to its horizontal position and ensure the push button springs up.

If you need to remove the lock, use a flat head screwdriver to lift out the screw caps (810.0443 + 810.0444).

Deep Clean

14-21

Empty Droppings Tray

2-3

DOs

Collect and enjoy your eggs everyday. Leaving eggs in the Eglu Cube can cause your chickens to go broody and not lay any eggs for a few weeks.

Make sure your chickens always have access to food and clean water.

Let your chickens out of the Eglu Cube everyday. If you are away, then leave the Eglu Cube door open so that the chickens can get out into the run in the morning. Not letting your chickens out will lead to distressed chickens and could lead to terminal overheating.

Supervise children when they are using the Eglu Cube or interacting with the chickens.

Wash your hands thoroughly after coming into contact with the Eglu Cube or chickens.

Be aware that chickens have sharp beaks and claws and they may peck or scratch at something that resembles food or looks interesting to them. Small shiny things are especially attractive to chickens.

Check that the door and rear panel are well secured. If they are not secure your chickens are at greater risk of escape and predators.

Keep your Eglu Cube in a shady spot during hotter weather.

DON'Ts

Do not let children inside the Eglu Cube. This could lead to them getting stuck.

Do not keep the Eglu Cube on uneven ground.

Do not use bleach, solvents or strong detergent to clean the Eglu Cube. They could damage the plastic.

Do not keep the Eglu Cube near sources of ignition, such as a bonfire or barbecue, because they could set the Eglu Cube on fire.

Do not use the Eglu Cube to house animals other than chickens. It has not been designed for any other purpose.

Do not keep more than 6 heavy breeds, 8 medium sized breeds or 10 small breeds in the Eglu Cube with the standard run and extension.

NEXT STEP, CHICKENS
