

Cleaning the Autodoor

Please avoid cleaning your Autodoor with industrial chemicals or a jet wash. We recommend cleaning only with soap and water or a pet safe disinfectant and treating red mite with powder only. For more detailed instructions, please visit www.omlet.co.uksupport/

1

Keep Safe until Step 4

2

3

Avoid getting water into the Gear Module

4

5

After rain in freezing temperatures, sleet or snow you may need to defrost your Autodoor to restore proper function to moving parts. To do this we recommend pouring warm (not boiling) water over any affected parts and then drying them.
