

EGLU GO UP

Run assembly guide

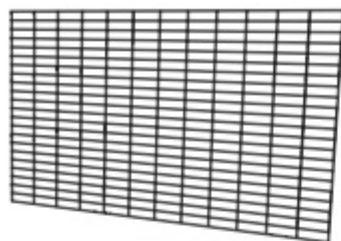

Omlet

The run is designed to be used outdoors for years to come. However, we recommend that you check your run regularly for signs of corrosion, especially if you live somewhere with extreme weather conditions or close to the sea. Corrosion will occur if the coating has been scratched or scraped, for example. If you do see some, remove any loose rust and touch up with a weather resistant paint.

For more support and to watch our 'How to Build' video scan the QR code.
