LET'S DO THIS

Ever tried Origami? With a pinch of patience, a flat piece of paper becomes something wonderful. Building an Omlet product works along the same lines. Follow our step by step instructions and watch your expertly engineered creation take shape.

The run is designed to be used outdoors for years to come. However, we recommend that you check your run regularly for signs of corrosion, especially if you live somewhere with extreme weather conditions or close to the sea. Corrosion will occur if the coating has been scratched or scraped, for example. If you do see some, remove any loose rust and touch up with a weather resistant paint.
